Benjamin LORIOT

Computer science student looking for some experience

I am a computer science student curious about everything but mostly interested in *data science*, *data engineering* and *web technologies*. I am currently pursuing a double degree in France and Canada.
If you want to see my extended resume with some links and examples you can check out my website.

EDUCATION

Master of Information Technology Engineering
École de Technologie Supérieure (ÉTS), Montréal, Canada   *2019 - 2021*
— Straightening of my knowledge in various fields of computer science including *Human-Machine interface* and *internet security*.
— Managerial skill such as *project management*, and *portfolio management*.

Master in Computer Science Engineering with a major in Data Mining
University of Technology of Compiègne (UTC), Compiègne, France   *2015 - 2020*
— In-depth study in *computer science, operational research, programming techniques, algebra* and *statistics*.
— *Data science, data engineering, decision support*, and *distributed computation*.

Semester Abroad
National Technical University of Athens (NTUA) - Athenes, Greece   *Spring 2017*

PROFESSIONAL EXPERIENCE

Developer Intern
Combient, Stockholm, Sweden   *Summer 2019 (2 months)*
— Design and implementation of a software to measure the health of open source communities. *(Python, Go, DGraph, Postgress, Forcasting)*

Research Intern
Royal Institute of Technology (KTH), Stockholm, Sweden   *Fall 2018 (6 months)*
— I had the opportunity to work on my own research project and to write of a scientific paper. *(Python, LaTeX, LSTM)*

PROJECTS AND ARCHIVEMENTS

French names trend visualisation from the past century until today
Fall 2019
— Analysis of the data, and creation of an interactive visualisation. *(Data Analysis, t-SNE, Vue)*

Embedding of developers based on the libraries they use
Spring 2019
— The goal of this research project is to find new techniques to asses who are the core developers of a project. *(Graph analysis, Co-clustering)*

Pollution tracking service
Winter 2017
— Creation of a device in order to track more accurately pollution in cities. *(Arduino, Angular, JavaScript)*

Wining team of the Hackathon UTC 2017
Nov. 2017
— Designing of a concept of a car network that improves security by sharing sensors. *(Arduino, C++)*

TECHNICAL STRENGTHS

Data Science	Programming languages	Front & Back	Other
XGBoost · t-SNE · PCA · Co-clustering · SVM · Matplotlib · Seaborn · Pandas...	Python · Go · Javascript · HTML5/CSS3 · Java	Vue · node.js · SQL · Graph-database (Neo4j, Dgraph) · MongoDB	CI/CD · Academic paper reading & writing · Internet Security · Arduino · LaTeX

Management	Project Management · Portfolio Management
Languages	French *(Native)* · English *(Advanced, TOEIC 975)* · Spanish *(Notions)*
